Foreword

The Manual on the Use of Thermocouples in Temperature Measurements was sponsored and compiled by Committee E-20 on Temperature Measurement and Subcommittee IV on Thermocouples of the American Society for Testing and Materials. The editorial work was co-ordinated by R. P. Benedict, Westinghouse Electric Corp.

Contents

Chapter 1—Introduction	1
Chapter 2—Principles of Thermoelectric Thermometry	3
2.1 Historical Development of Basic Relations	3
2.1.1 Seebeck	3
2.1.2 Peltier	4
2.1.3 Thomson	5
2.1.4 Interim Summary	6
2.1.5 Kelvin Relations	7
2.1.6 Onsager Relations	10
2.2 Laws of Thermoelectric Circuits	12
2.2.1 Law of Homogeneous Metal	13
2.2.2 Law of Intermediate Metals	13
2.2.3 Law of Successive or Intermediate Temperature	14
2.3 Elementary Thermoelectric Circuits	15
2.4 Bibliography	16
2.4.1 Early Historical References	16
2.4.2 Recent References	17
2.5 Nomenclature	17
Chapter 3—Thermocouple Materials	19
3.1 Common Thermocouple Types	19
3.1.1 General Application Data	19
3.1.2 Properties of Thermoelement Materials	23
3.2 Extension Wire	24
3.2.1 General Information	24
3.2.2 Sources of Error	28
3.3 Nonstandardized Thermocouple Types	33
3.3.1 Platinum Types	34
3.3.2 Iridium-Rhodium Types	39
3.3.3 Platinel Types	40
3.3.4 Nickel-Chromium Types	42
3.3.5 Nickel-Molybdenum Types	48
3.3.6 Tungsten-Rhenium Types	49
3.4 Compatibility Problems at High Temperature	52
3.5 References	54
Chapter 4—Thermocouples Hardware and Fabrication	55
4.1 Sensing Element Assemblies	56
4.2 Nonceramic Insulation	56
4.3 Hard-Fired Ceramic Insulators	58
4.4 Protection Tubes	58
4.5 Circuit Connections	63
4.6 Complete Assemblies	64
4.7 Selection Guide for Protection Tubes	65
4.8 Bibliography	70

Chapter 5—Sheathed, Compacted Ceramic-Insulated Thermocouples	71
5.1 General Considerations	71
5.2 Construction	71
5.3 Insulation	74
5.4 Wire	78
5.5 Sheath	78
5.6 Combinations of Sheath, Insulation, and Wire	78
5.7 Limitations of the Basic Material	79
5.8 Testing	81
5.9 Measuring Junction	82
5.10 Terminations	87
5.11 Installation of the Finished Thermocouple	87
5.12 Sheathed Thermocouple Applications	88
5.13 References	90
 Chapter 6—Emf Measurements	 92
6.1 General Considerations	92
6.2 Potentiometer Theory	93
6.3 Precision Potentiometry	95
6.3.1 Laboratory High Precision	95
6.3.2 Plant Precision	96
6.3.3 Portable Precision	96
6.4 Semiprecision Potentiometry	96
 Chapter 7—Reference Junctions	 98
7.1 General Considerations	98
7.2 Reference Junction Techniques	98
7.2.1 Fixed Reference Temperature	99
7.2.2 Electrical Compensation	101
7.2.3 Mechanical Reference Compensation	103
7.3 Sources of Error	103
7.3.1 Immersion Error	103
7.3.2 Galvanic Error	103
7.3.3 Wire Matching Error	104
7.4 References	104
 Chapter 8—Calibration of Thermocouples	 106
8.1 General Considerations	106
8.1.1 Temperature Scale	106
8.1.2 Working Standards	110
8.1.3 Annealing	111
8.1.4 Measurement of Emf	112
8.1.5 Homogeneity	112
8.1.6 General Calibration Methods	114
8.1.7 Calibration Uncertainties	115
8.2 Calibration Using Fixed Points	118
8.2.1 Freezing Points	118
8.2.2 Melting Points	119
8.3 Calibration Using Comparison Methods	119
8.3.1 Laboratory Furnaces	120
8.3.2 Stirred Liquid Baths	123
8.3.3 Fixed Installations	123

8.4 Interpolation Methods	125
8.5 Single Thermoelement Materials	130
8.5.1 Test Specimen	131
8.5.2 Working Standard	131
8.5.3 Reference Junction	131
8.5.4 Measuring Junction	132
8.5.5 Test Temperature Medium	132
8.5.6 Emf Indication	132
8.5.7 Procedure	133
8.6 References and Bibliography	134
Chapter 9—Installation Effects	136
9.1 Temperature Measurement in Fluids	136
9.1.1 Response	136
9.1.2 Recovery	138
9.1.3 Thermowells	139
9.1.4 Thermal Analysis of an Installation	139
9.2 Surface Temperature Measurement	141
9.2.1 General Remarks	141
9.2.2 Installation Methods	142
9.2.3 Sources of Error	146
9.2.4 Error Determination	147
9.2.5 Procedures for Minimizing Errors	149
9.2.6 Commercial Surface Thermocouples	149
9.3 References	151
Chapter 10—Reference Tables for Thermocouples	155
10.1 Thermocouple Types and Limits of Error	155
10.1.1 Thermocouple Types	155
10.1.2 Limits of Error	156
10.2 Thermocouple Reference Tables	157
10.3 Generation of Smooth Temperature-Emf Relationships	157
10.3.1 Need for Smooth Temperature-Emf Relationship	157
10.3.2 Methods of Generation	157
10.4 References	213
Chapter 11—Cryogenics	214
11.1 General Remarks	214
11.2 Materials	214
11.3 Reference Tables	216
11.4 References	228
Chapter 12—Bibliography	229
12.1 Introduction	229
12.2 Bibliography	229
12.3 CODEN for Periodical Titles	246
Chapter 13—Definitions	249

Acknowledgments

Editors for this Edition of the Manual

R. P. Benedict (chairman), Westinghouse Electric Corp.
E. L. Lewis (secretary), Naval Ship Engineering Center
J. A. Bard, Matthey Bishop, Inc.
G. W. Burns, National Bureau of Standards
R. S. Flemons, Canadian General Electric Co., Ltd.
H. J. Greenberg, Engelhard Minerals and Chemical Corp.
C. L. Guettel, Driver-Harris Co.
F. S. Sibley, Hoskins Manufacturing Co.
J. D. Sine, Honeywell, Inc.

Officers of Committee E-20

D. I. Finch (chairman)
R. F. Abrahamsen (secretary), Combustion Engineering Co.
D. A. Toenshoff (membership), Engelhard Minerals and Chemical Corp.

Officers of Subcommittee E-20.04

E. D. Zysk (chairman), Engelhard Minerals and Chemical Corp.
R. P. Benedict (secretary), Westinghouse Electric Corp.
A. J. Gottlieb (membership), Wilbur B. Driver Co.

Those Primarily Responsible for Individual Sections of the Manual

Introduction—J. L. Howard, The Boeing Co.
Principles—R. P. Benedict, Westinghouse Electric Corp.
Common Thermocouples—J. D. Sine, Honeywell, Inc.
Extension Wires—F. S. Sibley, Hoskins Manufacturing Co.
Nonstandard Thermocouples—H. W. Deem, Battelle Memorial Institute,
J. A. Bard, Matthey Bishop, Inc.
Compatibility—D. L. Clark, Oak Ridge National Laboratory, J. L.
Howard, The Boeing Co.
Fabrication—H. J. Greenberg, Engelhard Minerals and Chemical Co.
Sheathed Thermocouples—J. C. Faul, American Standard Aero Research
Instrument Department
Potentiometers—R. C. Stroud, Leeds and Northrup Co.
Reference Junctions—R. S. Flemons, Canadian General Electric Co., Ltd.
Calibration—J. F. Swindells and G. W. Burns, National Bureau of Stand-
ards, Washington, D. C.

Single Element Calibration—C. L. Guettel, Driver-Harris Co.

Fluid Installations—R. P. Benedict, Westinghouse Electric Corp.

Solid Installations—A. J. Otter, Atomic Energy of Canada, Ltd.

Reference Tables—J. D. Sine, Honeywell, Inc.

Cryogenics—R. L. Powell, National Bureau of Standards, Boulder

Bibliography—E. L. Lewis, Naval Ship Engineering Center, Philadelphia
Div.

In addition to those listed, many other members of Committee E-20 have made substantial contributions to this manual as authors and reviewers. Their help is gratefully acknowledged.
